

Trojak Family Basic is designed for family kayaking. Two adult seat and one for a child (or a dog). The child's seat is in in the front of the kayak which makes possible control when paddling (producer points out categorically that the child in the kayak must wear a mandatory life jacket, properly buttoned.)

Trojak is designed based on Amazon's model, adapted the stern kayak for a special child's place. Trojak's dimensions and performance are as excellent as Amazon's. If necessary, the kayak with dog place can easily be adapted to transport an animal up to 40 kg.

It is a fact that, our kayaks have been tested in the most difficult conditions while exploiting them in the rivers of Amazon and Siberia such as: the Amazon, the Rio Beni, the Madeira, and the Lena; thus they have stood the examination. We recommend Trojak III Expedition those people, who make plans for long and technically hard expeditions in the deep recesses of the globe where reliability and durability are of a great importance.

The fabrics used in hull is secure from the impact of saltwater, UV rays and from the most chemicals. Besides this, three layers of hard and waterproof varnish provide the framework with unparalleled durability. An additional equipment such as: safety line, rear loading hatch and pneumatic airspoons give comfort and safety which is indispensable during long

expeditions.

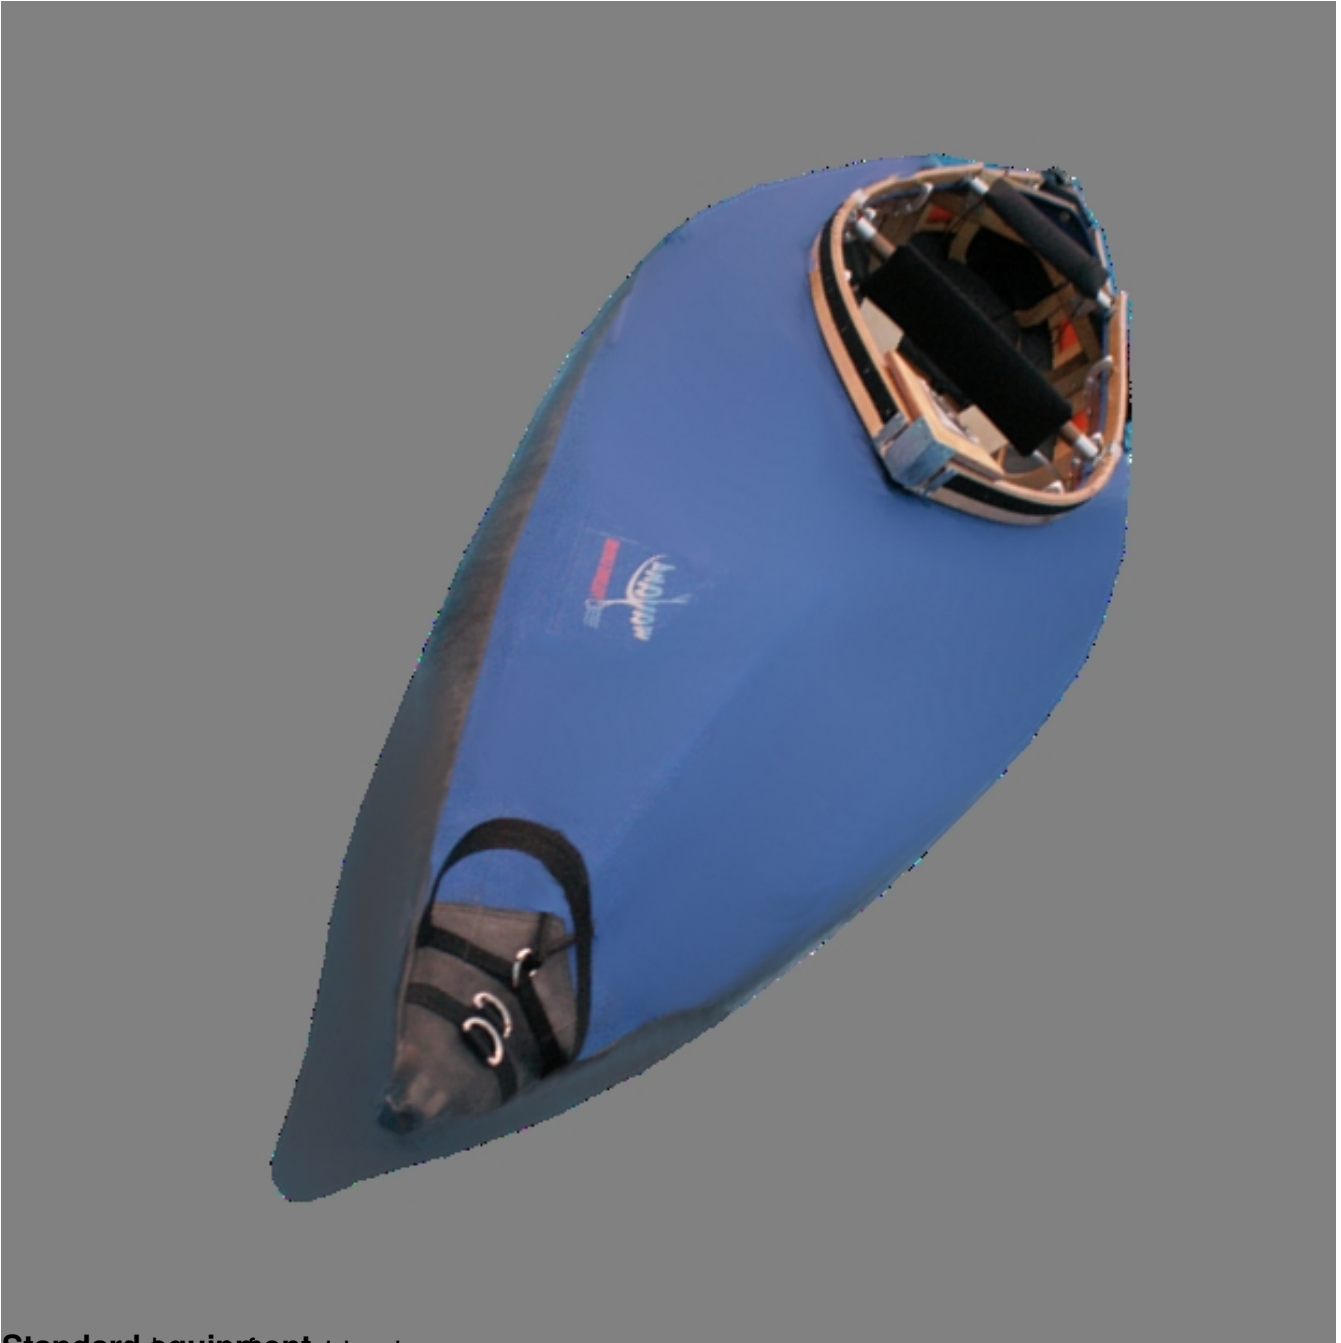

Technical data

- length x width 530 cm x 90 cm
- weight 38 kg
- payload weight 320 kg
- packaging: bag 30 x 30 x 150cm (floor), knapsack 90 x 50 x 40 cm (hull, ribs)
- assembly 15-25 min
- crew 2 persons + child or dog

Materials:

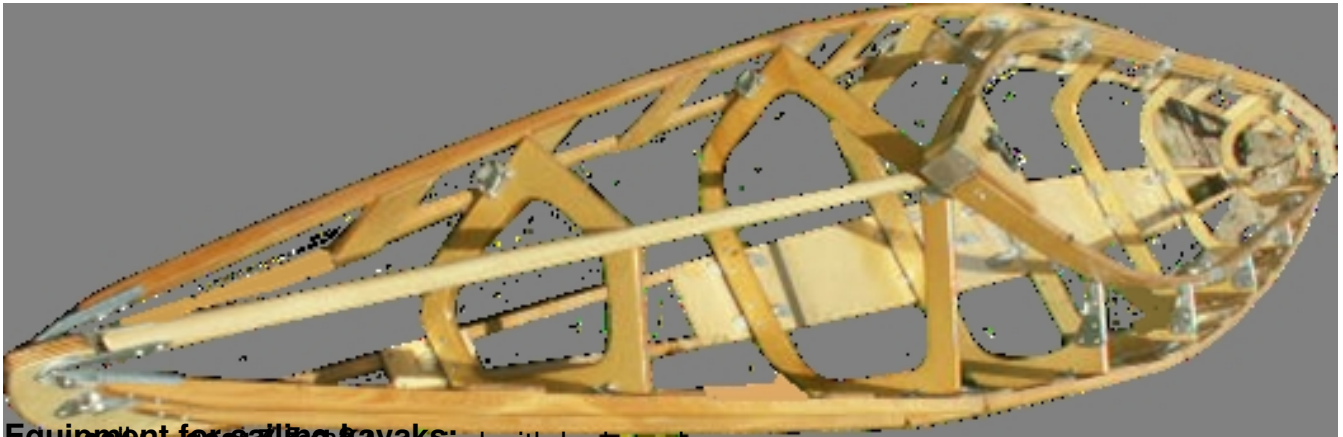

- Frame: ash, birch, waterproof plywood
- The frame is triple varnished with high performance epoxy resin based layers , coloristic of the frame : natural, brown , black
- Hull is made of following materials:
 - bottom : six layers coated HYPALON produced by PENNEL&FLIPO ORCA 866 (1500 g/m²) or ORCA DE4527 (1050 g/m²)
 - upperdeck: DIKLON 32 Marine made by DICKSON CONSTANT , water resistant, mold resistant, breathable acrylic tissue
 - airspoonson: PCV
 - fittings: DURAL alloys , corrosion resistant, stainless steel

Standard equipment includes:
Hull - made of high quality PVC
Accessories (pumps, repair kit, etc.)

bags for inside expedition kit
pumps, repair kit, etc.
